Crop Values: Final Estimates by States, 2002-2007, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1016.

Introduction: This publication presents final marketing year average (MYA) prices received by farmers and value of production for most U.S. field crops, fruits, and vegetables for 2002-2007. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Some value of production estimates have been revised slightly since they last appeared in Agricultural Statistics Board releases. These revisions resulted from field crop, fruit, or vegetable production estimates being revised for the period 2002-2007 due to additional survey or administrative data now available, including the 2007 Census of Agriculture. Most MYA prices for the period 2002-2007 have not changed since last published in Agricultural Statistics Board publications.

All prices in this report are MYA prices which do not include allowances or adjustments for commodities under government loan at the end of the marketing year, commodities forfeited to the Commodity Credit Corporation, loan deficiency payments, direct and counter cyclical payments, or disaster payments.

Each State MYA price is based on sales in the months comprising its marketing year, while U.S. marketing year averages are based on sales during the standard U.S. marketing year for each crop. See page 3 of this report for a listing of State and U.S. marketing years for selected crops.

United States MYA prices for most crops are computed by weighting State MYA prices by the estimated quantity sold in each State. The exceptions are for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, upland cotton, and dry edible beans, which are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. State MYA prices for these monthly crops are computed by weighting monthly prices by the monthly percentages of total sales during their marketing year.

State value of production is computed by multiplying each State price by its production. Value of production for the U.S. is the sum of State values for all States listed for the crop. Value of production estimates in this report relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production.

Historical Estimates: Final estimates of *Crop Values* in earlier years are available in Statistical Bulletins No. 999 for 1997-2002, No. 963 for 1992-97, No. 903 for 1987-92, No. 818 for 1982-87, No. 729 for 1978-82, No. 659 for 1974-78, No. 597 for 1969-74, No. 513 for 1964-69, No. 404 for 1959-64, No. 311 for 1954-59, No. 208 for 1949-54, and No. 115 for 1944-49. *Farm Production, Farm Disposition and Value of Specified Field Crop*, released March 1948, covered the period 1939-44.

Marketing Year Average Prices

Marketing year average prices received by farmers at the U.S. level for the crops listed below, with the exception of hay, are based on U.S. monthly prices weighted by monthly marketings during specific periods. These periods, by crop, are shown below. United States monthly prices are State average prices weighted by marketings during the month. The States included in monthly surveys generally account for 90 percent or more of total marketings and are shown on the next page. The monthly prices, used to calculate the MYA price for hay, are based on estimates derived from State marketing years and thus may extend over a period exceeding 12 months.

Crop Marketing Seasons for Specified Field Crops

Austrian Winter Peas: July 1 to June 30 for U.S. and all States.

Barley: June 1 to May 31 for U.S.; June 1 to May 31 for Arizona, California, Delaware, Kentucky, Maryland, New Jersey, North Carolina, Pennsylvania, and Virginia; August 1 to July 31 for Alaska and Maine; July 1 to June 30 for all other States.

² Crops included for each producing State are those shown in the U.S. summary tables on pages 6-17.

³ The U.S. total Field and Miscellaneous Crops column does not add because type 61 tobacco values for CT and MA are not included in the States' totals to avoid disclosure. Type 61 tobacco values for CT and MA are included in the U.S. totals. The U.S. total Fruits and Nuts column does not add because grape values for AZ and AR are not included in the States' totals to avoid disclosure. Grape values for AZ and AR are included in the U.S. total. The Total Value of Principal Crops column does not add due to the missing tobacco and grape values for the above mentioned States. These values are in the U.S. total.

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) released several products from the 2007 Census of Agriculture on February 4, 2009. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the Census year. Census publications also include demographic items such as sex of operator, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.
